

## Untreated Seed

Harris Moran's standard practice is to treat most species of seed to reduce the risk of loss or failure caused by insect and pathogen attack during germination and stand establishment.

While we will provide customers with untreated seed at their request, Harris Moran does not accept liability for failure to establish a stand in any case and even more so when untreated seed is used.

In order to clearly communicate the affects of untreated seed on stand establishment, customers requesting untreated seed of species normally treated will be required to sign a Buyer Contract of Terms and Conditions (often called a waiver or release) prior to shipment.
